

Product Information

LRC-RC2–LevelRemoteControl

Additional Remote Control for LRC-Small

Additional remote control for the overfill prevention system LRC-Small. For applications in non-hazardous areas only:

- cost optimized
- light weight, small
- supplied from standard batteries or rechargeable batteries
- functionality is identical to LRC-Small/Remote

For applications in explosive environments the LRC-Small/Remote has to be used.

RC-2 is delivered with two powerful AA-size rechargeable batteries. These can be recharged using a standard quick charger – an optional charger is available. RC2 can be supplied from standard batteries also.

LRC RC-2 is like the LRC-Small/Remote an additional remote control for the overfill prevention system LRC-Small and provides the following functions:

- **Motor / Pump Start/Stop – fill interruption**
- **Rotational speed control / hose reel control**
- **Dead mans handle / easy dead man's handle**
