

Product Information

Road Tanker Truck - COP Tester

Petrol station and depot crossfill simulation for tanker trucks

Ex-certified petrol station- and depot- simulator, for checking Cross Over Prevention system (COP) for road tankers.

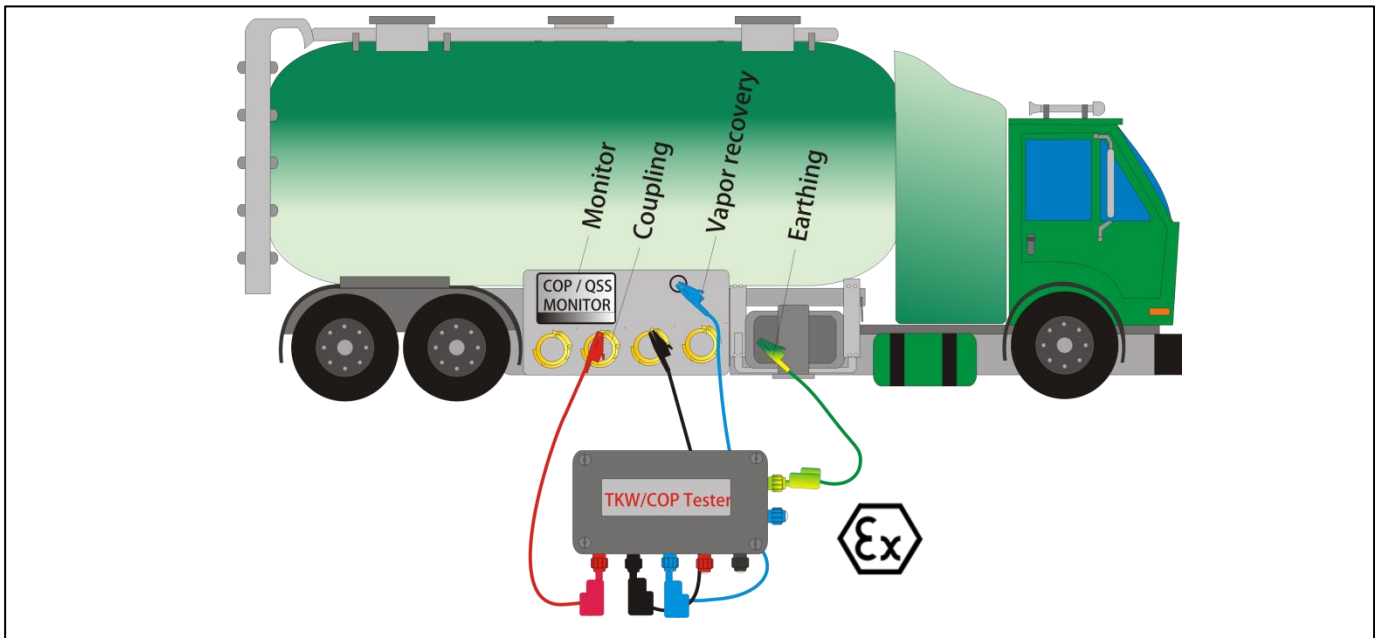

CrossOver prevention Tester

With the tester, the process of unloading to the petrol station or loading from the depot is simulated over the tanker-truck electronic.

The data format corresponds to the European standard (EN14116). The SECU COP Tester is fully compatible to all common truck management and COP systems on the market.

ATEX-certified for Zone 1

The COP-Tester support following ports:

- Grounding for petrol station and depot
- Petrol - filling stations
- Diesel, kerosine - filling stations
- Vapor recovery - filling station
- Petrol - depot
- Diesel, Kerosine - depot
- Vapor recovery - depot
