Subject: LRC-Small-Systems

We herewith confirm that the usage of the LRC-Small-system for filling- and overflow prevention is working perfectly. We are using the system now more than 5 years without any overfilling or spills.

I'm a Total-dealer in Belgium and have an own fleet of 5 trucks with own drivers which stands for approximately 20 deliveries a day to private households, commercial and industrial customer.

All trucks are equipped with the LRC-Small-system which proved to be user friendly, highly reliable and favourable in procuring.

I will fully recommend the system to all my Total colleagues in the combustible delivery business.

Customer orientation and responsiveness together with a high quality delivery service is where I stand for; only top equipment helps to reach these goals!

Best regards

Piet De Jans
